

Letter of Recommendation

To whom it may concern,

It is my pleasure to recommend **Silvina Batista**, an Argentine conceptual photographer whose work reflects a strong artistic vision and a deeply personal exploration of the photographic medium.

I have known Silvina and followed the development of her work since 2020, during which time I have had the opportunity to accompany and mentor her artistic process. Throughout these years, she has demonstrated remarkable commitment, discipline, and a clear conceptual direction in her practice.

Her photography is distinguished by a refined minimalist language and an introspective approach that explores identity, presence, and symbolic imagery. Silvina possesses a rare sensitivity in constructing images that are both visually precise and conceptually meaningful.

As a photographer with many years of experience in the national and international art scene, I can confidently say that Silvina Batista represents a serious and promising voice within contemporary photography. Her work shows the maturity, dedication, and artistic integrity necessary to participate in international exhibitions and platforms.

I highly recommend her work to curators, galleries, and cultural institutions interested in supporting thoughtful and distinctive contemporary photography.

Sincerely,

Alberto Natan
Photographer
